

FHIM View™ Quick Start

Your Guide to FHIMview.com

Interoperabilistists™

Health Solutions
Intelligent Resources, Informed Strategies

FHIM VIEW provides access to the FHIM information via:

- Word Search
- Category Selection
- Mind Map View
- Search Results Download
- Unique Element(s) Download*
- Codes Download

* As the first step to building and saving a detailed clinical model, the 'shopping cart' function is used to assemble the selected elements into a downloadable Excel spreadsheet.

Searching by Keyword

Search by Keywords

Click on this tab to search the model by keyword

Enter Keywords

Start by entering the keyword or phrase that you want to find here

Select Fields to Search

Check the fields to search for the keyword here, e.g. Property Name, Class Name, etc.

Search Query Display

When searches are performed the list constrains from 3662 entries to whatever matches the search/query

Details Display

Detailed information and codes for active single record highlighted/selected display here
